Power is a self-service business intelligence platform for connecting, modeling and visualizing data

Why Power BI?

- Connect, transform and load millions of rows of data
- You can build relational models to blend data from multiple sources
- Define complex calculations using Data Analysis Expressions (DAX)
- Bring data to life with interactive reports and dashboards
- Develop a versatile, in-demand skill set

Excel Only

- Spreadsheets
- PivotTables
- A1 Notation
- Cell Formulas

Power Bi Only

- Report View
- Custom Visuals
- Interactive Dashboards
- Power BI Service

Both Excel and Power BI

- Power Query
- Data Model
- DAX
