

Calculated Column Best Practices <Doc 000040X-Day 00006Y BI>

Monday, July 31, 2023 4:23 PM

07.22.2023

- ★ Transformations and Column Calculations should ideally happen as close to the original data source as possible to optimize performance and speed
- ★ Data Source -> Power Query -> Power BI Front-End -> Published Reports (The Closer the Transformations or Calculations are to the Data Source the better)
- ★ The Larger and more Complex your Data Model the more impact following these Best Practices will have on the speed at which your data model preforms
