## 07.04.2023

You need to track KPIs (sales, revenue, profit, returns), compare regional performance, analyze product-level trends and identify high-value customers

All you've been given is a folder of raw csv files

The end result should look something like this

You can drill into certain datapoints using this dashboard

You'll be able to drill into map tools too

We'll build this completely from scratch with just raw CSV files
